Dr. David Ho
Aaron Diamond AIDS Research Center

Dear David,

In an article in J. Clin Invest. entitled "Dynamics of HIV-1 Replication in Vivo" you write that "HIV-1 was shown in 1984 to be the causative agent of the acquired immunodeficiency syndrome (AIDS)." You provide no reference for this statement. I have been unable to find any reference (1984 or otherwise) that shows or, more precisely, proves that HIV causes AIDS. I would appreciate you providing me with such a reference.

Regards,

David Crowe
